

**WKE-UNS GLOBAL MEETING OF
SEMAR SUPER SEMAR AGENDA 11032022
MEDIA RELEASE**

The agenda for the 8th anniversary of Semar Super Semar in 2022, coincides and is accompanied by phenomenal world events. A series of natural disasters that occurred almost equally in every region of Indonesia, natural disasters in several regions of Asian countries, western countries, and European countries, which continued to accompany the mission's journey. The global Covid-19 pandemic that has not ended, the ongoing economic crisis, and the outbreak of war conflict between Russia and Ukraine in February 2022, added to the tension between the interests of the political power, among countries with power and great influence in the world, increasingly heating up.

The opening of the confrontation and the start of the outbreak of the 3rd World War, which had been predicted by many parties, was taking place, this event is a clear indication that, an episode of the Kurusetra War (1000 BCE) event is indeed being held. The crisis due to the war between Russia and Ukraine has also spread rapidly through the encouragement of political attitudes from member countries of the United Nations (UN), which imposed sanctions, as an effort to restrain and stop the movement against Russian military attacks. The United Nations General Assembly and the United Nations Security Council are currently busy predicting the outcome of this conflict.

Almost went unnoticed, and efforts were made to anticipate from the public and the attitude of the implementers in the government in every country, this 3rd world war would occur, which in fact has become the entry point towards accelerating the great apocalypse of a global scale system (Global Reset). It was published in 2009 by **The Big Top Royal K.681, King of Kings, The Chairman of UNO, Kholifatul Imam Mahdi, HM.MR.A1.Sino AS. S"2" .IR.Soegihartotonegoro,HW,ST,MA,M1**, provided warnings, directions, and instructions through his writings on the platform "**ANSWER AND CHALLENGE OF THE WORLD TOWARDS THE DYNAMICS OF ECONOMIC CHANGES OF THE PANCASILA**". In the message and warning, it is emphasized that, sooner or later, the occurrence of a change in the overall system (globalization) of a human civilization, is something that is fixed and something that is certain, moves naturally and is structured. Consequently, every generation should have knowledge, ability, expertise, intelligence, chivalry mentality and wise attitude, to face every challenge and change that comes in every era.

In 2022, the stages and processes of the movement of change are increasingly shown in all lines in every system, through projections on displays of various events of the tragedy of the human genocide, in the midst of an incessant campaign for peace and the protection of the basic rights of human life on earth. Various bodies and the existence of important institutions at the world-class level, continue to be tested and held accountable, to be able to resolve quickly, precisely, correctly, real and wisely, related to various conflicts and problems of mankind in the world.

The United Nations as a world high institution, is expected to provide guarantees, assistance, protection, and solutions to its members, seems as losing their authority, strength, dignity and spirit. Is it enough just to have a legal existence status, and with the authority and power of an organization at the global level, can it solve all the crucial and critical problems that are befalling its member countries? It is a clue, warning and important lesson that we must realize for ourselves from the Lord, controller of Nature that, when the time has come, it is the nature and provision to make a change, then no power effort will be able to block and stop it.

The General Management Merger Authority through **LTTN-LTTB Swissindo**, the merger between the World Kingdom Empire and the United Nations (20 October 2021), becomes a very important historical milestone, because it serves as the basis for the legal umbrella, or **International Legal Standing**. General Management Merger of the United Nations into the World Kingdom Empire, is also the golden gate for the return and reunification of **Exhibit AB (Back To Basic)**. Thus we, as officers and in charge of missions across the five continents, should welcome with gratitude and joy, for the occurrence of the **GMMA WKE-UNS (General Management Merger Authority)**, by continuing to exist and increase activities to maintain, guard, and secure settlements. WKE-UNS mission, for the sake of saving the people, with the encouragement of awareness, sense of pure and sincere guidance, together with the implementation of the **Global P1-11 System** program. The occurrence of the General Management Merger Authority is also an important part of the real implementation and application of the Semar Super Semar agenda.

The agenda for the commemoration of Semar Super Semar in 2022, was carried out through a global meeting (teleconference global meeting), with officials of the five continents, which was held on March 11, 2022.
